

the deployment server!

What is dPLOY?

dPLOY server assists in deploying software across the enterprise. You can centrally and rapidly manage, maintain, install, upgrade computers in your network.

What you gain with our dPLOY Server solution?

Very low total cost of ownership

- ➔ Avoid the excruciating cost of per user/seat/client licensing trap – now and in the future.
- ➔ Bid goodbye to frequent and expensive downtimes due to system crashes and virus attacks.
- ➔ Get out of the "mandatory" hardware upgrade cycle.
- ➔ Rapidly partition, format and load operating systems and software on client computers.

Backed by our responsive support delivered via email, telephone, on-site or remote administration service plans.

Features

Administrative and maintenance features

- All software used in your organization can be centrally located.
- You can remotely install systems & software on each computer.
- Unassisted or automatic operating system installation.
- Centralized network OS installation supported.
- Administrator can ensure installation of legal and authorized software.
- Very fast installation. For Example a typical MS Windows XP installation along with Openoffice, Thunderbird email, Firefox browser, PDF file reader, image viewer, etc. would typically take about 15 to 20 minutes on an average modern PC. Contrast this with a regular installation which may take more than half a day to install.
- Organization wide hardware and software inventory.

User features and customizations

- Users can install authorized software from the **dPLOY** server on demand
- No need to individually maintain software media
- Special folders are available on the server for software installation, driver updates, applications, etc.

Security features

- All operating system/software installed from the **dPLOY** server.
- You need to ensure clean, virus-free and legal software only at the server and/or special installation media.
- Access can be authenticated.

Operating systems supported

- DOS
- Windows 3.xx
- Windows9x
- Windows NT
- Linux

Note: Certain features may or may not be available for a given client platform.
