

intraSERV

Welcome to our Intranet Server solution!

*What is **intraSERV**?*

intraSERV module belongs to the Office Mantra family.

intraSERV server provides intranet services within your organization. It allows to deploy your own web and FTP services. It can also be scaled up to provide extra-net services.

You can build customized web-based applications on top of **intraSERV**

*What you gain with our **intraSERV** Server solution?*

Very low total cost of ownership

- ➔ Avoid the excruciating cost of per user/seat/client licensing trap – now and in the future.
- ➔ Bid goodbye to frequent and expensive downtimes due to system crashes and virus attacks.
- ➔ Get out of the "mandatory" hardware upgrade cycle.
- ➔ No additional training required for the end-users. If they know how to operate their current operating system and web browsers, then they can use our system from day one.
- ➔ Support for most of the popular clients and workstation like *DOS, MS Windows 3.xx, MS Windows 9x, MS Windows NT/2000, Linux (Redhat, Suse, etc.), various Unix flavors like Solaris, HP-UX, IRIX, SCO Unix, etc.*

Backed by our responsive support delivered via email, telephone, on-site or remote administration service plans.
